Summary

I am a frontend web developer with about 2years experience in the field trying to provide solutions to everyday real life issues that can be solved with programming. Within my years of experience I have been able to contribute to some open-source projects and also build and deploy some of my web apps, some of which are contained in my portfolio website.

I'm skilled in most frontend languages, libraries and frameworks, which include HTML, CSS, JavaScript, Python, Django, Restful APIs, Nodejs, Angular.js, Vue.js to name a few.

My past projects include:

- building a functional logistics website - richlogistics.netlify.app
- leading a team to build, with the help of WordPress, a multivendor clothing store
- creating and deploying a clothing and apparel store - teniolastores.netlify.app

Aside from these i also spent my free time on GitHub searching for open-source repositories to contribute to.

Experience

Freelance Designer

Upwork

Mar 2022 - Present (5 months +)

I work as a freelancer at Upwork in order to expand my skills and gain experience

Education

freeCodeCamp

frontend web design, Responsive web design

2020 - 2021

Here I learnt the basics of web design, This was my starter

Adekunle Ajasin University

Bachelor of Science - BS, Computer Science
